**Re: Navistar's Enhanced Tooling Transparency Form**

In an effort to streamline the current tooling quoting process, the Navistar Tooling Transparency Document has been enhanced to further automate and simplify this communication. The Rollout of this new file format will begin on April 1, 2012 as all new Navistar RFQ will include the updated form. From this point forward all future Tooling Quotation submissions will require the new form. As of this timing the system will not be backward compatible to accept the old format. In addition, to address any current quote activity in the interim, the new document can also be manually downloaded from the Navistar Supplier Purchasing Website the week of March 26<sup>th</sup> at the following URL:

<http://www.navistarsupplier.com/SupplierTooling/SupplierTooling.asp>

New File Name: **SBT2\_Tool\_Transparency\_Version2**

This new document is self explanatory and includes integrated help within the file in the form of "hover over" help text boxes, however, should you require additional assistance with the process or have any questions about this new form please contact your Navistar Tooling Manager.

Regards

*Ralph A. Johnson*
